

AMALMON K H

BCA STUDENT | DATA ANALYTICS ENTHUSIAST

PROFILE

Third-year BCA student passionate about Data Analytics, Business Intelligence, data visualization, and meaningful insights that help solve real-world problems. Experienced in data cleansing, metrics dashboard composition, and translating complex datasets into clear, actionable summaries.

EXPERIENCE

DATA ANALYTICS INTERNSHIP

Apr – May 2026

IPSR Solutions Limited (2 Months)

- Cleaned and structured transactional database files using Excel and Power Query to process 15,000+ records, resolving 98% of missing variables.
- Designed and deployed 5+ interactive Power BI and Excel dashboards tracking key performance indicators (KPIs), enhancing decision-making speed by 30%.
- Wrote and optimized SQL queries in MySQL to retrieve and filter transactional datasets from 50K+ records, reducing query execution times by 15%.
- Conducted trend analysis on transactional datasets, identifying operational opportunities and presenting recommendations to project leads.

PROJECTS

Netflix Data Analytics Dashboard

2 Weeks

Power BI, Excel, Power Query

- Processed and cleaned 10,000+ content records using Excel and Power Query, standardizing categories and parsed genre classifications.
- Developed a multi-page interactive Power BI dashboard featuring movie vs. TV show ratios and library growth trends with drill-down filters.

Restaurant Sales Analysis

3 Weeks

Excel, Power BI, Data Analysis

- Structured 5,000+ sales transaction records to model revenue trends across weeks, months, and peak ordering hours.
- Analyzed customer purchasing patterns and top menu combos, identifying opportunities to improve operational efficiency and business profitability.
